

SR-800 surface measuring device kit

Product Number EP0201065

Product Description

SR-800 surface measuring device kit

Surface measuring device for testing electrostatically conductive or dissipative surfaces. Flexible and can be used anywhere thanks to 9V battery operation. Internal measurements (point to point) are made possible by two built-in electrodes. Two connections for external electrodes are available for point-to-earth measurements. Automatic switching of the measuring voltage between 10V and 100V, as well as a battery indicator are further features of the surface tester.

Measuring range: 103 Ω - 1012 Ω

Scope of delivery:

- Surface tester
- PVC carrying case
- 2 x electrodes (2.27 kg)
- 2 x 1m test leads
- 2 x alligator clip
- 9V battery
- Calibration certificate
