

Overshoes for Hygomat overshoe dispenser

Product Number EP0104010

Product Description

Overshoes for Hygomat made of PP

The antistatic overshoes are equipped with a sewn-on, black contact band that prevents static charging. The tape conducts electrical charge into the floor in a controlled and safe manner. Antistatic overshoes are therefore ideal for industry and anywhere where both employees and machines need to be protected from electrostatic charge.

Important: To ground the body, the black antistatic tape must be **in contact with the skin**. It is long enough to be simply tucked into socks, for example.

The antistatic overshoes are made of air-permeable PP fleece and, as original Hygomat overshoes, are **suitable for all Hygomat overshoe machines**. These extremely time-saving and efficient overshoe dispensers are four times faster than manual donning and are universally recommended for all hygiene areas. They are particularly economical, work without electricity and are location-independent.

The ESD overshoes are suitable for all shoes and shoe sizes.

- antistatic disposable overshoes made of PP fleece
- with dissipative, black contact tape
- air-permeable and comfortable
- universal for all shoe types and sizes
- suitable for all Hygomat overshoe dispensers
