

ESD earthing bracelet elastic, magnetic connection

Product Number EP0105027

Product Description

The silver-plated polypropylene yarn is pure silver, which is irreversibly bound to the fibers. This results in both an antimicrobial and an odor-inhibiting effect. These threads are randomly knitted on the inner surface of the material and electrically insulated from the outer surface. The length of the wrist strap can be adjusted quickly and easily using the clasp. The underside of the clasp is made of medical-grade stainless steel, giving the wrist strap a long service life. In addition to its excellent electrical properties, the wrist strap is also extremely comfortable to wear, making it pleasant to work with all day long.

Knitted elastic band made of light blue fiber with:

50 threads of textured polyester

36 threads of Lycra spandex

14 threads of silver-plated polypropylene yarn

Snap fastener connection DK 4

Width: 22mm

Thickness: 2,5mm

Length min.: 64 mm

Max. length: 330 mm

Connection: MAGSNAP magnetic connection

Matching spiral cable with 1 M Ω safety resistor: EP0103029
