

Extension set CPS, Charged Plate for EFM 822/823

Product Number EP0201015

Product Description

The Charge Plate Set turns the EFM 822 or EFM 823 into a charge plate monitor for monitoring air ionizing units in accordance with DIN EN 61340-5-1 or EOS/ESD S.3.1. The charging electrode with a capacity of 20 pF complies with the standards. The discharge time of +1,000 V ... +100 V or -1,000 V....-100 V is measured with a start-stop timer integrated in the EFM 822/823. Charging is carried out with an external HV converter.

- Scope of delivery**
- Carrying case with antistatic foam insert
 - Device base
 - Plate capacitor (charge plate)
 - HV converter ± 1200 V
 - 9V battery/rechargeable battery
 - Plug-in charger
 - Operating instructions
