

Digital surface tester DESCO 19290 Kit

Product Number EP0201064

Product Description

Digital surface tester DESCO 19290 Kit

The DESCO 19291 Teraohmmeter for point-to-point and point-to-earth resistance measurements. Equipped with an internal memory for up to 100 measurements and a large OLED display with display for measurement and temperature. This teraohmmeter works with test voltages of 10 V or 100 V. The kits include the DESCO Teraohmmeter, two measuring electrodes, two test leads and a spacer. Teraohmmeter for point-to-point and point-to-earth resistance measurements as a kit with electrode pair

- Internal memory for up to 100 measurements
- Large OLED display with indication of measurement, temperature
- rel. Humidity and test voltage
- Additional LED display for the resistance exponent
- Measuring range: $1.0 \times 10^3 \Omega$ to $>1.0 \times 10^{12} \Omega$
- Test voltage: 10V or 100V
- incl. 2 measuring electrodes (2.27 kg each), 2 test leads (1.50 m each) and spacer
