

Body Voltage Meter

Product Number EP0201068

Product Description

Desco 19431 Body Voltage Meter

The Desco 19431 Body Voltage Meter is a portable measuring system that can be used to analyze the charge levels accumulated on the human body in accordance with DIN EN 61340-4-5.

It is completely portable and does not require a PC for data acquisition as all data is measured and recorded in the internal memory.

Test graphs can be shown on the LCD display for quick analysis. The data can also be exported and analyzed on a PC to create professional records.

Scope of delivery:

- Body Voltage Meter
- Handheld probe
- USB cable to 8 pin DIN, 1.80m
- Earthing cable, 5m
- Calibration certificate
