

Charged Plate Monitor DESCO 19494

Product Number EP0201086

Product Description

Charged Plate Monitor

Hand-held measuring device for measuring the offset voltage and discharge times of air ionizers
For regular testing of ionizers in accordance with ANSI/ESD SP3.3 and ESD TR53.

Timer for decay rates from $\pm 1000V$ to $\pm 100V$

Measures the ability of ionizers to neutralize both positive and negative electrostatic charges within the detection range.

180-degree rotating head with 70 x 25 mm plate

Allows the operator to read the display from different angles

Button for setting the zero point

Ensures measurement accuracy and repeatability

Powered by 2 AA batteries

With earthing cable and soft carrying case
