

Electrostatic sensor IZD110, 10–50mm

Product Number EP0202001

Product Description

Electrostatic sensor for potential measurement: ± 0.4 kV. The effective sensing distance is 10 to 50 mm, the output voltage 1 to 5 V. Includes 24 VDC5 cable for supply voltage.

- Output voltage: 1 to 5 V
- Effective scanning distance: 10 to 50 mm
- Supply voltage: 24 VDC5 with cable
