

Clamp electrodes for textiles

Product Number EP0204005

Product Description

Standardized clamp electrode according to IEC 61340-4-9 for ESD clothing and textiles. When measuring ESD protective clothing (e.g. ESD work coats), measurements should be taken across the seams, i.e. from sleeve to sleeve. The clamp electrodes are used as accessories for the TOM 8600 Teraohmmeter and enable the arm-to-arm measurement required by IEC. The connection is made via a 4 mm safety socket.

- Contact surfaces: 25 x 50 mm
- Connection: 4 mm safety socket
- PU: 2 pieces
