

Personal tester X3 incl. foot electrode

Product Number EP0206001

Product Description

Shoe and wrist strap test station Combotester X3 including shoe electrode and wall bracket.

The Combo Tester X3 tests the functionality of an operator's wrist strap and footwear. Both feet of the test person and the wrist strap are checked for compliance with the 750 k Ω – 35 M Ω range. The limit values can be set via DIP switches. The measurement results are displayed via status LEDs. The combo tester has a long-life button for starting the test routines, without mechanical parts. The potential-free relay contact can be used to activate an access system after a successful test. The Combo Tester X3 is supplied complete in a set with 2-pole shoe electrode and wall bracket.

Special features:

- Limit values adjustable via DIP switch
- Measurement results displayed via status LEDs
- Test modes adjustable via DIP switch
- Relay output

Scope of delivery:

- Combotester X3
- Power supply unit 12V DC
- Mounting plate for wall mounting
