

EPA-RESIST 8000S access control system

Product Number EP0206067

Product Description

Extended access control through cascading for the EPA-RESIST 8000 personnel tester (**master-slave function**).

Enables the release of access authorization via relay contacts to other EPA areas after data synchronization with the EPA-RESIST 8000.

People who have successfully tested themselves on the EPA-RESIST 8000 can then use other EPA access points, e.g. doors or turnstiles, with their RFID card.

- RFID recognition of the employee card
- 3 relay contacts
- LAN connection for connection to EPA-RESIST 8000
- No software installation necessary
- Administration via LAN using integrated web application

The device can only be used in conjunction with the EPA-RESIST 8000.
