

Antistatic floor coating agent, 10 l

Product Number EP1204011

Product Description

The floor coating agent is used to dissipate static charges and prevent triboelectric (static electricity) charges. It complies with IEC 61340-5-1 ESD Flooring Table 1 and is a liquid emulsion that can be applied to any hard surface or sealed floor, including vinyl, linoleum, rubber, asphalt, sealed or painted wood, terrazzo and concrete.

It dries in one hour and is ideal for cleanroom and electronics manufacturing, assembly and test areas.

- Canister with 10 l,
- Statically dissipative: $R_p = 10^6$ to $10^8 \, \Omega$
- reduces charge generation when walking
- removes the charge from your body in conjunction with ESD shoes
- non-slip
- creates a high-gloss surface
- Coverage: 49 m² per liter of coating on smooth surfaces
- RoHS compliant,
- Packaging: Bag-in-box packaging,
