

Electric field meter rental EFM 823 & CPS

Product Number EP1601007

Product Description

Rental device (**price per rental week**) Electric field meter EFM823 + charge plate set, Plug-on charge plate and HV transmitter ± 1200 V for measuring the effectiveness of ionizing devices and their offset voltages, incl. case set with battery charging station, with analogue output Handy, mobile electric field meter with digital display for measuring electric fields and electrostatic charges. The measured field strength (V/m) is automatically converted into the voltage potential (V) over the set measuring distance.

- Measurement type: Influence principle (field mill principle)
- Measuring range: 0 to ± 200 kV
- Display: 2-line LCD display
- Operating mode: Battery operation

Scope of delivery

- Electric field meter EFM823 with analog output ± 1 V
- ESD case with conductive foam insert
- 2 pcs. 9V NiMH block batteries Plug-in charger
- Earthing spiral cable with tapping terminal
- 2 spacers (2cm)
- HV converter Plate capacitor
- Operating instructions
- Calibration certificate
