

BGT Visio 600 rental device

Product Number EP1601021

Product Description

Rental device (rental price per week)

High-precision electric field meter for walk-on test/walking test for measuring and displaying in real time the **electrostatic charge of a person in accordance with IEC DIN EN 61340-4-5** when walking on an ESD floor with ESD shoes.

It is used for additional testing after the ESD floor has been checked for its conductivity, e.g. using a Tera-Resist8000.

The **measurements** are shown directly on the tablet's display **as a real-time measurement curve** using the software supplied and the recorded data can be **saved and archived** as a **measurement curve on the tablet**.

To the **product video**

Application examples:

- Walk-through tests according to IEC 61340-4-5
- Field strength measurements in machines (long-term monitoring of processes)
- Discharge time measurements

Scope of delivery:

- Electric field meter with high sensitivity and installed voltage measuring head
- Windows tablet PC with 10" touch display with detachable keyboard
- EFM Read_Out software (pre-installed)
- Aluminum system case with foam insert
- Hand electrode
- Silicone measuring cable, yellow, length 3 m
- USB cable with mini plug
- Spiral earthing cable with crocodile clip
- Operating instructions
- Calibration certificate
