

Shielding tape, vulcanizing tape

Product Number EP0901038

Variants Width: 19 mm

Product Description

Shielding tape 4.60 m x 19 mm,

Self-sealing, dissipative vulcanizing tape for quick and easy conversion of existing, conventional tools such as screwdrivers or similar into ESD-compatible tools. The handle or object to be covered is wrapped spirally with shielding tape. After approx. 30 minutes, the tape is fully vulcanized and now forms an ESD-compliant, dissipative protective cover.

- Electrical resistance: 10^4 Ohm ,
- Roll length: 4.60 m,
- Roll width: 19 mm
