

WIHA ESD pliers set 4 pcs.

Product Number EP1403073

Product Description

WIHA ESD pliers set 4 pcs.

- ESD diagonal cutters (EP1403064), pliers length: 115 mm, cutting force: 2
- ESD diagonal cutters (EP1403058), pliers length: 115 mm, cutting force: 7
- ESD diagonal cutting pliers (EP1403074), pliers length: 115 mm, cutting force: 2
- ESD flat nose pliers (EP1403071), pliers length: 120 mm

When working on electronic components, there is a risk of destroying them. With the Professional ESD pliers set, this problem is a thing of the past. The ESD pliers are manufactured in accordance with the international standard IEC 61340-5-1 and therefore guarantee maximum protection for electronic components. The dissipative pliers handles have a surface resistance of $10^6 - 10^9$ ohms and dissipate electrostatic energy safely and in a controlled manner. The side cutters and diagonal cutters with opening spring included in the set are perfect for cutting soft copper wires. A narrow pliers head also makes it possible to work in particularly hard-to-reach places. The round nose pliers with opening spring are ideal for fine gripping and bending work in electronics. All ESD pliers are stored safely and neatly in a robust bag.
