

## SCS Shielding and moisture protection bags

**Product Number** EP0701380

**Variants** Width x height in mm: 305 x 455 mm

### Product Description

- Shielding bag with moisture protection (moisture barrier bag) and defined water vapor permeability thanks to polyester and polyethylene multilayer
- Thickness: 4.5 mils, 0.114 mm + / -10%
- Sealable, vacuum packable, in accordance with EN 61340-5-1, RoHS-compliant
- EMI shielding more than 40 db
- ESD warning symbol imprint
- PU: 100 pieces

### Technical Data

|                             |                                                             |
|-----------------------------|-------------------------------------------------------------|
| Stärke                      | 0,114 mm                                                    |
| Verkaufseinheit             | 1 VE                                                        |
| Inhaltseinheit              | 100 Stück                                                   |
| Farbe                       | Silber                                                      |
| Material                    | Polyester und Polyethylen                                   |
| Oberflächenwiderstand innen | 1x10 <sup>11</sup> Ohm                                      |
| Oberflächenwiderstand außen | 1x10 <sup>11</sup> Ohm                                      |
| Shielding Eigenschaften     | 10 nJ                                                       |
| EMI-Abschirmung             | mehr als 40 db                                              |
| ESD gerecht                 | ja                                                          |
| Aufdruck                    | ESD-Warnsymbol                                              |
| Normen                      | Verschweißbar, vakumierbar, nach EN 61340-5-1, RoHS-konform |
