

WEZ BLACKLINE® Futura container

Product Number EP0705030

Variants Length x width x height: 400 x 300 x 120
mm

Product Description

WEZ BLACKLINE® Futura container

External dimensions / usable internal dimensions mm: 400 x 300 x 120 / 362 x 262 x 115

New design: Integrated label inserts for A4 width on all 4 sides

Centering ribs near the bottom for centering, lifting or pulling

Openings in the upper edge area for mechanical handling with standard gripping and lifting devices

Base with drive-on chamfers, all-round flat support

roof-shaped base retraction for optimum transportation on roller conveyors etc.

The WEZ BLACKLINE® ESD Euro container Futura is a **new generation of containers from WEZ** for manual and mechanical handling. The new design takes into account both the requirements of modern logistics and the possibilities of today's plastics technology.

For example, hollow corners in conjunction with the upper edge construction ensure **maximum stability**. The base has drive-on bevels, a circumferential flat support and a roof-shaped base retraction, which enables optimum transportation on roller conveyors. There are **integrated label inserts** for A4 widths on all 4 sides. The **centering ribs close to the base** make centering, lifting and pulling easier. Furthermore, the stackable WEZ BLACKLINE® ESD Euro container Futura has openings in the upper edge area for mechanical handling with commercially available gripping and lifting devices. It meets the technical requirements of DIN EN 61340-5-1 and IEC 61340-5-1.
