

Hot air gun HG 2320 E ESD

Product Number EP0401019

Product Description

Professional Line

For processing heat-shrink tubing or other thermal applications.

Sits perfectly in the hand: The HG 2320 ESD has a powerful 2300 W and generates hot air between 80 – 650 °C. The temperature is easily controlled using the joystick and is absolutely precise. The LCD info display, together with the residual heat indicator, ensures additional safety, while the four individually adjustable programs provide greater flexibility.

Thanks to its full ESD conformity, the HG 2320 ESD does not build up static charges and is therefore an excellent choice for use in EPA (ESD Protected Areas).

- Electronically controlled hot air blower
- 2300 W
- digital temperature setting via joystick from 80 – 650 °C
- Temperature displayed in 10 °C increments via LCD display
- Air volume regulation in 2 stages from 150 – 500 l/min.
- ESD-compliant, meets the requirements of IEC DIN EN 61340-5-1; Part 5-1:2008 ff.
