

ESD-PROTECT MultiGround Monitor

Product Number EP0205040

Product Description

Permanent ESD monitoring device **to ensure permanent earthing of the work surface and wrist strap.**

The new MultiGround Monitor from ESD-PROTECT **combines two essential functions in one device:** it not only enables **personal earthing via the wrist strap**, but **also continuously and reliably monitors the permanent earthing of the person and the work surface** using precise control measurements.

- Fast and accurate measurement of the correct earthing of the work surface and the wrist strap
- All-in-one - no separate earthing of the person necessary
- Internal buzzer to sound the alarm
- LED strip to indicate earthing status (green = ok, blue = park position, red = fault + audible alarm)
- Dimensions: 145 mm x 65 x 35 mm (L x W x H)
- Relay output for connecting external devices
- Operating voltage: 230V AC / 24V DC
- **complies with ESD standards IEC 61340-5-1, ANSI/ESD S20.20**

Scope of delivery:

- 1 MultiGround surveillance monitor
- 1 power supply unit, 24VDC, earthed output
- 1 IEC plug for power supply unit
- 1 connection cable for workstation mat
- 1 Velcro tape for attaching power supply unit
- 1 earth connection set
- 1 screw mounting set

Technical Data

- Abmessungen: 145 mm x 65 x 35 mm (L x B x H)
- Relaisausgang zum Anschluss externer Geräte
- Betriebsspannung: 230 V AC / 24 V DC
